

PRODUCT DATA SHEET

UN51 - 24 Oz UNCOATED FIBERGLASS WELDING BLANKET

This material is an uncoated 24 oz plain weave fiberglass cloth. The material is capable of withstanding temperatures up to 1000°F, providing a fabric that balances performance with affordability.

UN51-39-24 Rolls 39.25" X 150' (1 X 45.72 meters)

UN51-61-24 Rolls 61" X 150' (1.55 X 45.72 meters)

Temperature Limitations for Short Periods Up to 1000°F (538°C) ***

Temperature Limitations for Continuous Use Up to 500°F (260°C) ***

Thickness Availabilities 0 .029" (0.74mm)

Density Availabilities 24 oz/yd² (0.81 kg/m²)

Typical Uses Light duty welding blanket, welding curtains, heat shields, splash curtains for molten metals, pre-heat and post heat pads.
